SUMMARY

Experienced Artificial Intelligence Trainer & AI Specialist

Dynamic AI Trainer and Specialist with a robust background in Artificial Intelligence, Data Science, and Advanced Python Programming. Expertise in Generative AI, Chatbots, Natural Language Processing (NLP), and Large Language Models (LLMs), coupled with a strong foundation in agile methodologies. Proven track record as Head of AI Department, leading innovative projects, empowering teams, and successfully **training 1084+ students in AI and emerging technologies**. Certified across multiple AI domains, delivering scalable solutions that bridge cutting-edge technology with business needs.

- **AI Model Development & Generative AI:** Skilled in designing, training, and deploying generative AI systems, including text-to-text, image generation, and LLM applications like GPT and BERT.
- **Chatbots & Conversational AI:** Proficient in developing AI-driven chatbots and virtual assistants, leveraging NLP and advanced frameworks to create seamless user experiences.
- **Data Science & Predictive Analytics:** Extensive experience in data preprocessing, visualization, and predictive modeling, applying statistical and machine learning techniques for actionable insights.
- **Agile Leadership & Scrum Master Expertise:** Certified Scrum Master with expertise in managing cross-functional AI and software development teams, ensuring timely delivery of high-impact solutions.
- **Advanced Programming Skills:** Accomplished in Python, C++, and OpenCV, specializing in advanced programming techniques for AI, image processing, and software automation.
- **AI Strategy & Department Leadership:** Proven ability to lead AI departments, define strategic roadmaps, and implement innovative solutions that drive organizational transformation.
- **AI Training & Capacity Building:** Successfully trained **1084+ candidates** in Artificial Intelligence, Machine Learning, Generative AI, and Advanced Python, empowering the next generation of tech professionals.

CERTIFICATIONS

- Certified AI Associate - Salesforce
- Certified AI Specialist - Salesforce
- Nutanix Certified Professional - Cloud Integration 6
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle University
- TiDB Workshop for MySQL Users (TiDB Specific Features) – TiDB
- TiDB Practitioner – TiDB
- Certified Prompt Engineering for Everyone – Cognitive Class – IBMSkillsNetwork
- Life Long Learning – Certiprof® – LLL™
- Prompt Engineering Foundation – Certiprof® – CPEFPC™
- Master Python Web Scraping & Automation using BS4 & Selenium - Udemy
- Introduction to Data Science – Cisco Networking Academy
- Data Analytics Essentials – Cisco Networking Academy
- Python Essentials 1 – Cisco Networking Academy
- Python Essentials 2 – Cisco Networking Academy
- Certified ScrumMaster® – LinkedIn
- Professional Certificate of Agile and Scrum Business Analyst – LinkedIn

WORK EXPERIENCE

Artificial Intelligence Trainer | Corvit Networks Muzaffarabad

Jan 2024 – Present

- **AI Solution Leadership:** Led teams in designing and deploying AI-driven solutions, targeting applications, cloud platforms, and automation workflows.
- **ML Model Development:** Developed and optimized machine learning models for real-world applications, ensuring performance and scalability.
- **Data Analysis:** Conducted data collection, preprocessing, and feature engineering for efficient model training and decision-making.
- **AI Automation Tools:** Built AI-powered tools for monitoring, analysis, and process optimization across workflows.
- **AI Training Programs:** Designed and delivered AI training, simplifying complex concepts and driving organizational upskilling.
- **AI Research & Innovation:** Researched emerging AI trends, delivering innovative solutions to address business challenges.

Tableau Data Visualization Project

Self-Initiated Project | 2025

- Created a comprehensive Tableau tutorial covering the end-to-end data visualization process including:
 - Tableau installation and data loading
 - Data cleaning and preparation
 - KPI creation (employee count, attrition rate, active employees, average age)
 - Custom charts: Lollipop, Pie, Donut, Bar, and Matrix (Heatmap) charts
 - Interactive dashboards with filters, parameters, and floating layouts
 - Dashboard formatting, styling, and responsiveness across devices
- Employed calculated fields, bins, parameters, and dual-axis charts to design dynamic visuals.
- Demonstrated advanced formatting using manual sorting, label customization, and image background integration.
- Optimized dashboards for business insights in employee attrition analysis.

RAG with DeepSeek R1 – Reasoning AI Chatbot

Self-Initiated Project | 2025

Developed a **Retrieval-Augmented Generation (RAG) Chatbot** powered by **DeepSeek R1** to enable reasoning-driven Q&A over uploaded PDFs. Integrated both **local (Ollama)** and **external (Groq)** LLM hosting for flexible deployment.

Project Phases:

- **Phase 1:** Built chatbot UI with **Streamlit**, implemented **PDF upload functionality**, and created initial Q&A chatbot skeleton.
- **Phase 2:** Configured **vector database (FAISS)** for memory, loaded and chunked PDFs, and set up embeddings using **DeepSeek R1 with Ollama**.
- **Phase 3:** Developed the **RAG pipeline**, connected memory with LLM, and enabled reasoning-based document retrieval & responses using **Groq**.
- **Phase 4:** Integrated all components into a complete **end-to-end AI training project layout**.

Technical Architecture & Tools:

- **Models & Hosting:** DeepSeek R1 (CoT reasoning model), Ollama (local hosting), Groq (external provider)
- **Frameworks & Libraries:** LangChain, Streamlit, Pdfplumber
- **Vector Store:** FAISS for embeddings & retrieval
- **Core Concepts:** Retrieval-Augmented Generation (RAG), vector embeddings, semantic document understanding

Key Outcomes:

- Delivered a **reasoning AI chatbot** with retrieval-based augmentation to **reduce hallucinations** and ensure answers come only from uploaded sources.
- Demonstrated the role of **vector embeddings** for semantic representation of text and effective knowledge retrieval.
- Successfully applied the project in the **AI Training Certification Program**, guiding learners through practical **RAG implementation and LLM integration**.

Git & GitHub Proficiency

Version Control | Branch Management | Collaboration Workflow | CLI Expertise

- **Local & Remote Repository Management:** Proficient in creating, initializing, and managing Git repositories locally using `git init`, and connecting them to GitHub using `git remote add origin`. Well-versed in staging (`git add`), committing (`git commit`), and pushing code (`git push origin main`) efficiently.
- **Branching & Collaboration:** Skilled in creating and managing branches (`git branch`, `git checkout`), isolating feature development (e.g., `Feature_1`, `Feature_2`), and using `git merge` to integrate changes. Understands fast-forward vs. no fast-forward merges and handles merge conflicts effectively.
- **Version History & Change Tracking:** Experienced with Git commands such as `git status`, `git diff`, and `git log` to monitor modifications, untracked files, and commit histories. Able to roll back changes or restore files using Git's powerful `restore/reset` features.
- **Remote Collaboration & Pull Requests:** Familiar with GitHub collaboration workflows using Pull Requests (PRs) for code reviews and collaborative development. Adept at resolving push issues, handling origin conflicts, and managing multiple remote URLs.
- **Markdown & README Documentation:** Writes professional documentation in `README.md` using Markdown syntax, including code blocks, links, images, lists, and formatted headings for clarity and project presentation.

- **Terminal & Bash Workflow:** Experienced with Git Bash and PowerShell for performing Git operations. Able to create multiple folders using terminal commands (`mkdir`), navigate directories (`cd`), and verify contents (`ls -a`) for repo setup.
- **VS Code Integration:** Utilizes Visual Studio Code for streamlined Git operations with built-in source control, change visualization, extensions, and terminal integration for seamless version control.
- **Git Configuration Mastery:** Configures Git globally and locally using `git config --global user.name` and `user.email`, and retrieves settings with `git config --list` for consistent commits.

Artificial Intelligence Team Lead & HOD | NUEXUS Technologies

March 2024 – Present

- **AI Team Leadership:** Led cross-functional AI teams, managing project delivery, task allocation, and progress tracking.
- **AI Solution Development:** Directed the design and deployment of scalable AI models, focusing on real-world applications and performance optimization.
- **Intern Mentorship:** Designed structured programs and hands-on tasks, mentoring interns to build foundational AI and ML skills while aligning projects with organizational goals.
- **ML Model Development:** Guided data collection, preprocessing, model training, and evaluation, involving interns in key phases to promote practical learning.
- **AI Tools and Automation:** Led the development of AI-powered tools, assigning exploratory tasks to interns to encourage contributions and skill-building.
- **Research and Knowledge Sharing:** Drove AI research initiatives, encouraging interns to explore trends, share insights, and present innovative solutions.
- **Collaboration:** Translated business needs into actionable AI projects, ensuring clarity on goals, tasks, and deliverables for interns and stakeholders.

Computer Science Instructor | Muslim Educational Complex Peshawar

March 2023 - Jan 2024

- Taught foundational computer science concepts and programming skills, fostering student understanding and practical application.
- Conducted paper composing and documentation tasks, ensuring accuracy and timely delivery of educational materials.
- Assisted with curriculum implementation, providing support for academic programs and student assessments.
- Mentored students, promoting problem-solving, analytical thinking, and proficiency in computer applications.

Physics & Mathematics Instructor | Fazaia Degree College Peshawar

March 2022 – Nov 2022

- Taught core concepts in Physics and Mathematics, simplifying complex theories and fostering problem-solving skills among students.
- Designed and delivered engaging lesson plans, ensuring alignment with the academic curriculum and student learning objectives.
- Provided individualized mentorship, helping students strengthen their analytical and critical thinking abilities.
- Assisted in academic planning and student performance evaluation to drive overall academic success.

Physics & Mathematics Instructor | ICMS School Systems Peshawar

Jan 2021 - March 2022

- Taught **Physics** and **Mathematics** to **Class 9th** and **10th** students, focusing on key topics such as **Newton's Laws**, **Electrostatics**, **Linear Equations**, and **Trigonometry**, while simplifying complex theories for better comprehension.
- Developed and implemented **lesson plans** tailored to the **SLO Based syllabus**, ensuring each topic was covered in-depth with real-life applications to enhance student engagement.

- Provided **one-on-one mentorship** to struggling students, offering targeted support in areas like **Algebra, Optics, and Kinematics** to strengthen their analytical and problem-solving abilities.
- Assisted in designing **examination papers** and evaluating student performance through regular quizzes, assignments, and mock tests to track progress and identify areas for improvement, leading to better academic outcomes.

Corporate Trainings

- **AI & ML Fundamentals:** Delivered training on AI and ML concepts, including supervised/unsupervised learning, model development, and deployment strategies.
- **AI Solution Development:** Trained teams on designing scalable AI models and integrating them into business workflows.
- **Data Science & Analytics:** Conducted workshops on data collection, preprocessing, feature engineering, and advanced analytics for decision-making.
- **AI-Powered Automation:** Provided training on building AI-driven tools to optimize workflows and improve operational efficiency.
- **AI Strategy & Innovation:** Delivered executive training on leveraging AI for business growth and competitive advantage.
- **Customized Workshops:** Designed tailored sessions to address specific AI, ML, and data challenges within organizations.
- **Hands-on AI/ML Training:** Facilitated practical training with real-world case studies for better application of AI/ML concepts.
- **AI Ethics & Governance:** Led training on ethical AI development, governance best practices, and aligning AI systems with regulatory requirements.

CORE COMPETENCIES AND SKILLS

- **AI Solution Leadership:** Expertise in leading teams to design and deploy AI-driven solutions, with a focus on cloud platforms, automation workflows, and real-world applications.
- **Machine Learning Model Development:** Proficient in developing, optimizing, and deploying machine learning models to ensure scalability, performance, and practical applications across industries.
- **Data Analysis & Feature Engineering:** Skilled in data collection, preprocessing, and feature engineering to enable efficient model training and insightful decision-making.
- **AI Automation & Tools Development:** Experience in building AI-powered tools for process optimization, monitoring, and analysis to streamline enterprise workflows.
- **Training and Knowledge Sharing:** Extensive experience in designing and delivering AI training programs, simplifying complex concepts, and promoting organizational upskilling.
- **Research & Innovation in AI:** Strong background in researching emerging AI trends and integrating innovative solutions to solve business challenges.
- **Team Leadership & Mentorship:** Proven ability to lead cross-functional teams, manage project delivery, and mentor interns and students in AI and machine learning concepts.
- **Curriculum Design & Teaching:** Expertise in developing and delivering educational content in computer science, physics, and mathematics for diverse learning levels, from foundational to advanced.
- **Student Mentorship & Support:** Skilled in providing individualized support to students, fostering critical thinking, problem-solving, and proficiency in STEM subjects.
- **Academic Planning & Assessment:** Experienced in curriculum implementation, academic program support, and student performance evaluation to drive academic success.

EDUCATION

Master of Computer Science Sarhad University of Information & Technology Peshawar, KP, Pakistan	Nov 2021 – April 2025
Bachelor of Telecommunication Engineering University of Engineering & Technology Peshawar, KP, Pakistan	Sep 2016 – Sep 2020
HSSC Pre-Engineering FG Degree College for Boys Peshawar Cantt, KP, Pakistan	Aug 2014 – Aug 2016
